WARRANTY & CARE

Warranty

Door County Furniture warrants its furniture for a period of (5) years from the date of purchase to be free from defects in workmanship, provided it is not altered, subjected to misuse or been used in a commercial setting. Failure to use proper cleaning or polishing products will invalidate this warranty. Your furniture is a product of nature, season splits, checks, expansion and contraction of parts are considered natural and may be a result of not maintaining proper humidity levels of 35% - 45%. These natural occurences shall not be considered defects in workmanship. If damage is deemed by Door County Furniture to be defective in workmanship, your furniture will either be repaired or replaced at the discretion of Door County Furniture free of charge. Transportation fees are not the responsibility of Door County Furniture. Limited warranties are non-transferable from the original retail purchaser.

Cleaning & Care Recommendations:

CLEANING YOUR HEIRLOOM

A damp clean soft cloth is all that is necessary to keep your furniture looking great for years. Use a mild soap that does not contain micro-abrasives (i.e. Dawn) only use mild soap when necessary. Follow up with a clean soft cloth to dry.

POLISHING YOUR HEIRLOOM

Polishing your new product is not necessary. Your new furniture has been finished in a high quality catalyzed varnish that gives it a natural luster and smooth finish. DO NOT USE any polish for the first 6 months until your furniture has fully cured. Should you decide to occasionally polish your furniture use a non-silicone & wax free polish. Failure to do so will create a buildup and dull appearance. We recommend using a product such as Guardsman. See your local retailer for recommendations

THINGS TO AVOID

Avoid placing extremely hot food or objects directly on your table.
Avoid using vinyl or plastic placemats or tablecloths as they can contain silicone products that can react with the finish on your table causing damage
Avoid sliding rough or abrasive items across your table without a placement underneath
Avoid any silicone or wax based products to clean your furniture
Avoid direct sunlight and heat sources
Avoid letting spills sit. Standing liquid can cause damage over time

HUMIDITY CONTROL

Keeping your homes humidity level between 35% - 45% is essential to your furniture. By doing this you reduce the risk of swelling, season cracks, and warping. Solid wood is a natural fiber and will shrink and swell with the seasons. Tabletop joints between leaves will gap slightly in the center or edge depending on the humidity of the season. This is a natural process of the wood and can be helped with humidity control.

WOOD SPECIES

Oak

Northern red oak primarily grows in the eastern U.S., particularly in the Appalachian Mountains. Heartwood is a pinkish reddish-brown. The wood is similar in general appearance to white oak, but with a slightly less pronounced figure due to the smaller rays. The wood is mostly straight-grained, with a coarse texture.

Maple

Brown maple lumber may be taken from different maple species across the country. Generally the sapwood is greyish-white, sometimes with darker colored pith flecks. The heartwood varies from light to dark reddish-brown. The wood is usually straight-grained.

Select Maple- Hand selected without mineral dark streak. Can still have figure in the grain.

Wormy Maple- Describes a fungal discoloration caused by wood-boring ambrosia beetles.

Cherry

Appalachian cherry heartwood varies from rich red to reddish-brown and will darken with age and exposure to light. In contrast, the sapwood is creamy white. The wood has a fine uniform, straight grain, satiny, smooth texture, and may naturally contain brown pith flecks and small gum pockets.

Sap Cherry
Appalachain cherry that includes large sap streaks as well as Filled small knots. Medium to Dark stain recommended. There is a wide color variation

Rustic Cherry
Appalachain cherry that includes sap streaks as well as Filled heavy knots.

Elm

Grey elm wood can vary substantially. The heartwood is grey to reddish-brown color. The sapwood has a white to crème color. The grain is straight but can be interlocking. The wood has a coarse and uneven texture.

WOOD SPECIES

Hickory

Hickory is the hardest, heaviest, and strongest American wood. The sapwood of hickory is white, tinged with inconspicuous fine brown lines, while the heartwood is pale to reddish-brown with a coarse-texture that accepts stains well. Hickory can have small tight knots.

Rustic Hickory- Large filled Knots.

QSWO

Quarter-Sawn White Oak- Harder than northern red oak, white oak is often quarter-sawn for furniture use which showcases the stunning ray flecks, interlocking, and wavy "ribbon" patterns of white oak timber. The sapwood is light-colored and the heartwood is light to dark brown. White oak has a medium to coarse texture, with longer rays than red oak. White oak therefore has more figure.

Rustic QSWO- Quarter-Sawn White Oak that includes Filled heavy knots.

White Oak (Flat Cut)

Select White Oak- Harder than northern red oak. Flat Cut straight through, creating a wide cathedral-like grain pattern. No Knots in Select.

Rustic White Oak- Flat Cut White Oak that includes Filled heavy knots.

Rustic Walnut

Rustic Walnut- The vast majority of Black Walnut comes from the Eastern United States, particularly from forests in the Midwest and Appalachian regions.Rustic Black Walnut has Filled knots and Sap wood (light color).

* Select Black Walnut is available on certain items call for pricing.

FINISH INFORMATION

We at Door County Furniture want only the best for you and your new furniture. Therefore, we use high quality Clear Post-Catalyzed Topcoat varnish on all our stains and paints to ensure optimum durability of your heirloom quality furniture.

An upgraded conversion varnish offering:

Smooth Feel

Non-yellowing formula offers excellent clarity

Extremely tough, durable finish

Outstanding moisture and chemical resistance

Solid Hardwood is a natural fiber; therefore, each piece is uniquely different and will vary in coloration and appearance making each piece one of a kind. When choosing the wood species for your individual heirloom furniture keep in mind that woods oxidize over time causing the wood to change color. Some species do this more rapidly than others such as cherry. This does not affect the durability of your furniture but rather enhances its natural beauty.

Finishing options:

Single Stain is standard

Two-Tone Stain

All Over Paint

Two-Tone Paint

Paint with Rub-Through (All Over or Two-Tone)

All items are available unfinished without warranty.
Unfinished items will need to be sanded before finishing.
Warping is possible if not finished immediately.
